WOLFE NURSERY

Home of Frost-Resistant Fruit Trees

STEPHENVILLE, TEXAS

Wolfe's PRICES Average LESS

Dear Customer:

It is a pleasure to hand you my new catalogue of the finest and most select varieties of Fruit and Nut trees in the World. My time as a Texas Nurseryman has been spent in quest of NEW and more PROFITABLE varieties. This enables you to get the best Trees and Plants in the WORLD from Wolfe Nursery without paying any more than you would pay for just ordinary stock of uncertain origin.

We offer the experience and creations of the three greatest Plant breeders in this country: E. E. Risien (breeder of finer paper shell Pecans), T. V. Munson (World famous for his Grape culture) and J. W. Stubenrauch (originator of Heavy bearing FROST RESISTANT Peaches). We are growing "Risien pecans," and "Stubenrauch peaches" by their request and have bought the Munson vineyard and nursery.

Our stock is grown in fertile soils, ideal conditions and propagated with the most modern methods. Our expert growers produce Trees with big root systems, insuring stronger, quicker growth and early, heavy production. Our customers report that our trees yield the BIGGEST CROPS of the highest QUALITY and the best COLORED fruit. Many of them report that our trees yield from \$200.00 to \$500.00 per acre.

The SUN never sets on Trees shipped from Wolfe Nursery. We have supplied Experiment Stations and Individual Growers in nearly every Nation of the world. We challenge anyone to produce trees of our Quality and Price. "EVERY PLANT A GOOD ONE" is our motto and trees that do not measure up to our high standards are discarded.

As your Nurseryman, I will always try to help with any problems that may arise and serve you to the best of my ability.

Sincerely yours
Ross R. Wolfe.

Members: Texas Association of Nurserymen and American Association of Nurserymen.

PICK WOLFE'S NURSERY**

HIGHWAY 10

POST PAID: All large items listed in this catalogue are F. O. B. Stephenville. Plants or collections that are to be post-paid will be identified with the words Post Paid.

C. O. D.: Send 25% of total price when you order C. O. D. Pay balance on arrival to your express agent or to Postman. PLEASE DO NOT SEND STAMPS. Send Cash in registered letter. We will gladly accept your personal check. Postal Money Orders or Express Money Orders are safe methods of remitting.

ERRORS: Most all the errors in our office are due to carelessness on the part of the customer when making out the order. Please print your name and be sure to print your complete mailing address. Look your order over twice before mailing it.

SECTION MAP: Our research department has provided a section map in order that you may choose more wisely the varieties that you should plant. This is vital for small Home Orchards and we request Commercial Orchardists to follow the map closely.

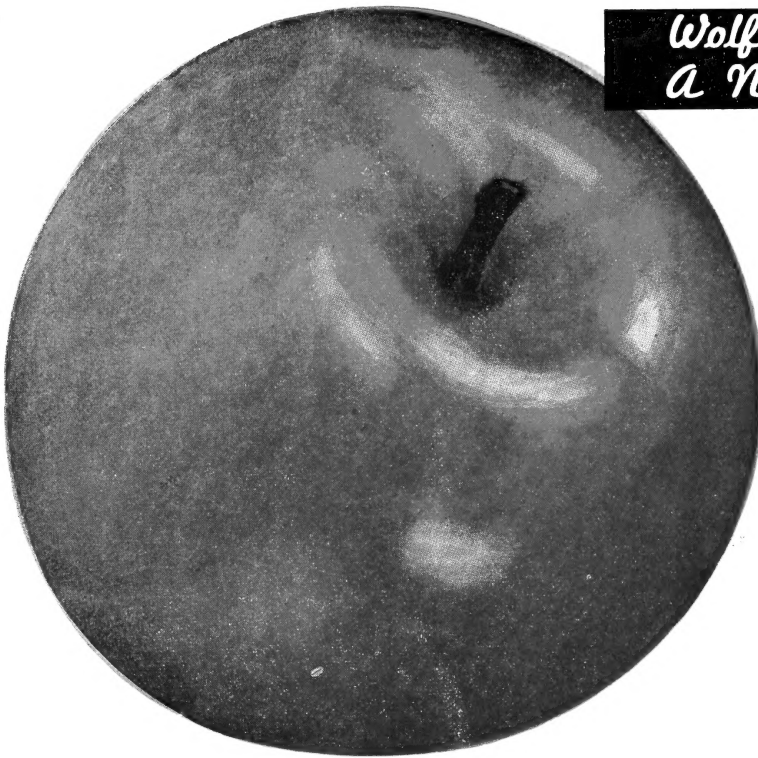

FROST RESISTANT SIGN: Look for the "Frost Resistant" Sign. \$\$\$\$ denotes FROST RESISTANT, \$\$\$ denotes less resistant, \$\$ denotes reasonably Frost Resistant and \$ denotes Easily killed. It pays to plant FROST RESISTANT TREES. They make more crops of better quality fruit.

BUDS & GRAFTS: Buds, grafts of nut and fruit trees, grape cuttings, propagating tools and supplies, together with other items, will be listed in a special catalogue. If interested, please write for "budding bulletin" and special catalogue.

GUARANTEE: Every tree or plant shipped from Wolfe Nursery is guaranteed to be true to label, to reach you in good condition and as described herein. No Nursery could use more caution in filling orders than we do, but should our packers make an error, we will gladly make any adjustment if the request is made within ten days after shipment is made. We are not to be held liable for any greater amount than purchase price. Every tree is triple inspected and packed to reach you in first class condition. With care in planting all trees and plants should live. Trees that die the first year will be replaced at one half price. Requests should be made during the Month of September, 1942.

Wolfe's HOLLAND APPLE A New Money Maker

This APPLE will put Texas and the South in Competition with Northern Apple Growers.

TRANSCENDENT CRAB APPLE: (Siberian) Ripens in July. An attractive yellow color, splashed and striped with red; bears very young. Buds and blossoms exquisitely beautiful. Sections 2, 3 & 4. Price same as Holland.

Every Tree a Good One

MAKE MONEY . . . GROW WOLFE APPLES IN YOUR ORCHARD

All Varieties Proven in Our Experimental Orchards.

DELICIOUS: AGAIN this year I raised Big Red Delicious Apples that weighed a pound. Wonderful flavor and beautiful shape makes them market specials. Every home should plant a few apple trees. Ripe in September & October. Sections 2, 3 & 4.

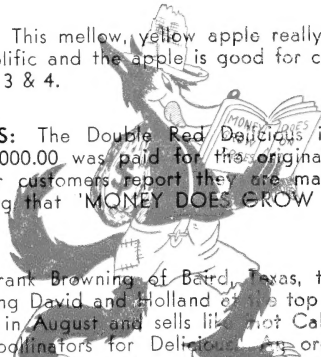

Jonathan: The Jonathan Apple is not so large but it makes up for this in color, quality and heavy bearing. It ripens in the South about the middle of September. Sections 2, 3 & 4.

Golden Delicious: This Apple is just like Delicious except it is a golden yellow; good keeper and a real money maker. Ripe the same time as DELICIOUS. Sections 2, 3 & 4.

YELLOW TRANSPARENT: This mellow, yellow apple really gets ripe about June 10th. The trees are very prolific and the apple is good for cooking and for early market. Good in Sections 1, 2, 3 & 4.

DOUBLE RED DELICIOUS: The Double Red Delicious is just like Delicious except it has more red. \$5,000.00 was paid for the original limb. I have the genuine stock. Several of our customers report they are making from \$15.00 to \$25.00 per tree . . . Proving that "MONEY DOES GROW ON TREES". Same sections as Delicious.

KING DAVID: Mr. J. Frank Browning of Baird, Texas, the largest Apple grower in this section, places King David and Holland at the top of his list for Money makers. King David gets ripe in August and sells like hot Cakes. King David and Golden Delicious are good pollinators for Delicious. An orchard of Holland and King David properly cared for will net \$100.00 to \$125.00 per acre. Sections 2, 3 & 4. We have a few trees of these varieties. McIntosh, Red June, Anoka, Lodi.

JOHN GARNER
Out Bears All Pecans

Pecans are an investment that will pay big dividends for the rest of your life. A small investment in a Garner Pecan grove will make easy Money for you and several generations to come. Pecans set in proper soil will immediately double the value of your land.

X JOHN GARNER PECAN: The very finest pecan grown and will bear one-third more per tree than any other pecan. Garner produces nuts the first or second year after you plant them because our "YOUNG BEARING" system makes them bear in the Nursery rows. Garner is Frost-resistant and one of the first pecans on the market. Everyone says it is the most beautiful pecan grown. It is the only true paper-shell—so thin it can be cracked with the fingers. The creamy delicious kernels are extremely rich in oil, proteins, carbohydrates, vitamins and distinctive flavor. Use in uplands of sections 2, 3 & 4. Altitudes of 600 ft. and up.

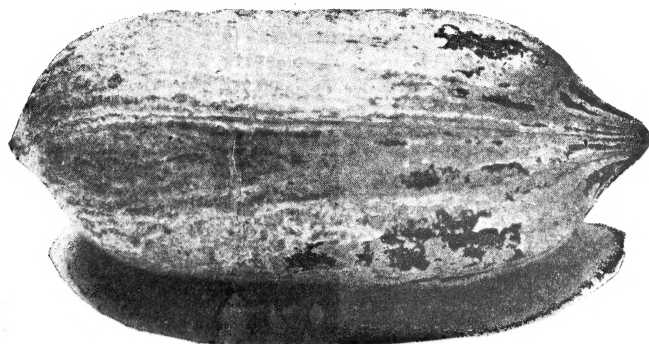

JOHN GARNER PECANS — THEY PAY

6-7 ft.....	2.75	2.50	2.25
7-9 ft.....	3.95	3.75	

NOTE: Have John Garner in all grades except 7-9 ft.

WOLFE'S GIANT MEYHAN

WOLFE'S GIANT MEYHAN: The largest pecan grown. It looks like Western Schley only much larger. Nuts must be thinned on the tree for best production. Meyhan is a true paper-shell pecan that brings more per pound than any pecan. Adapted to sections 1, 2 & 3.

Grafted Pecan Trees

Burkett, Western Schley, Schley, Success, Stuart, Delmar and Moore. Grafted Meyhan. We recommend these grafted trees for East Texas and sections with an altitude of 600 feet and less where winter temperature does not go below zero.

PRICES OF GRAFTED TREES

Burkett—It Turns c to \$

PRICES OF ALL BUDDED PECANS (except GARNER & MEYHAN) (F. O. B. Stephenville—No packing charge)

Certified Size	Each	10 to 49	50 to 299	300 up
2-3 ft.....	\$1.00	.95	.70	.55
3-4 ft.....	1.25	1.20	.90	.75
4-5 ft.....	1.50	1.40	1.10	.95
5-6 ft.....	1.75	1.60	1.35	1.20
6-7 ft.....	2.25	2.00	1.50	
7-9 ft.....	3.75	3.50	2.50	

BURKETT: The Burkett is and will continue to be the leader of western varieties. Its flavor cannot be equalled. It is a regular producer of large fat pecans that bring top market prices. As long as we have been in business, the market demand for Burkett pecans has never been supplied. Plant Western Schley and John Garner with Burkett for perfect pollination. Burkett is adapted to sections 3, 4 and 2 except in low bottom land in 2.

WESTERN SCHLEY: The perfect cracker. As the photograph shows, it is a long, well shaped beautiful nut. The shell is thin and soft. The tree is remarkably healthy, strong grower, early and heavy producer. Western Schley is a Genuine Risien Gold Medal pecan and REMEMBER, they are already bearing when we sell them. Same sections as Burkett and Garner.

Western Varieties . . .

Who will feed a starving world? Answer: The man who grows pecans . . . the nut that contains four times as much food value per pound than meat.

Western Schley for shade or commercial orchard.

**PECANS Will Pay the TAXES
On Your Home**

Wolfe PECAN TREES—Already Bearing

YOU DON'T HAVE TO WAIT FOR WOLFE TREES TO BEAR

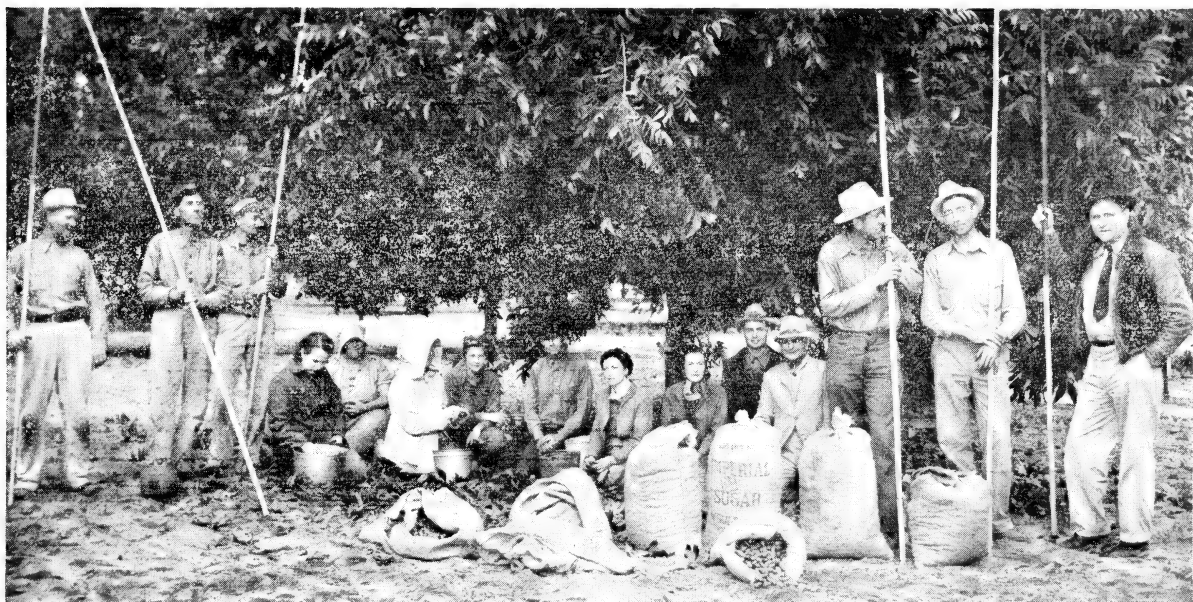

SAN SABA IMPROVED: This not only looks good, it tastes good. The kernels are very smooth, firm, light colored and come out in perfect halves. The cracking qualities of this nut make it a favorite of Shellers, Candy Houses and Baking companies. Ripens early and good in sections 3, 4 and 2 except in low bottom land.

HALBERT: Early and prolific bearer. Medium sized nuts with an excellent flavor. It is an extra thin shelled variety and especially good for black waxy or heavy soils. Same Sections as Garner.

SQUIRRELS' DELIGHT: An ideal pecan for sections having a short growing season. Oklahoma, New Mexico and Kansas are ideal States for this hardy pecan. This nut is long like Schley with a delicious flavor and fine quality. Sections 2, 3 and 4.

COMMONWEALTH: This is the latest variety to put on leaves and bloom in the spring and still ripens early. FROST RESISTANT. Commonwealth is long like Schley and is a heavy bearer. Remember, Wolfe Grown Pecan trees are bearing when you get them. You don't have to wait for production. Sections 2, 3, 4.

ONLIWON: Similar to Success with thinner shell.

\$5,000.00 from this 21 acres of Pecans . . 25,000 lbs.

See this record producing Pecan Orchard at Wolfe's
Nursery — Visitors always welcome.

SEEDLING PECAN TREES: 1 to 2 ft., 15c each, \$10.00 for 100; 2 to 3 ft., 25c each, \$15.00 for 100.

Note: These trees have to be sold to vacate land this year.

"MONEY Does GROW On TREES"

Risien GOLD MEDAL Pecans

E. E. Risien, World's foremost Pecan Breeder and winner of Gold Medal and many other awards. Originator of Western Schley, San Saba Improved, John Garner, Onliwon, Squirrels Delight and Commonwealth Pecans. Mr. Risien, 87 1-2 years old, passed away September 23, 1940. By his request we will continue his work of breeding pecans and ornamental live oaks.

Eastern Pecan Varieties

E. E. Risien

Wolfe PECAN TREES—Already Bearing

STUART: Stuart is a good producer and the long attractive nuts bring a premium on the market. The shell is rather thick but soft and the meat is sweet and brittle. Sections 1, 2. REMEMBER! Wolfe pecan trees are bearing when you get them.

Proof of Wolfe's Early Production

Our system of growing and budding makes them bear right in nursery row.

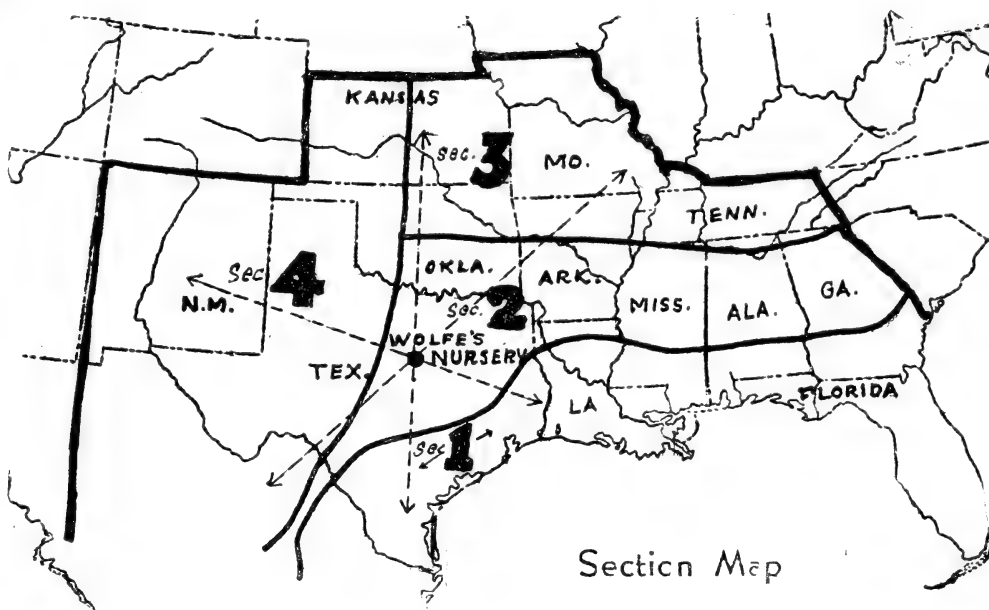

EASTERN SCHLEY: This is the standard of excellence among pecans. The tree is healthy and it has made an excellent production record in the native pecan belts of Texas, Arkansas and Oklahoma in altitudes from 350 to 1,000 feet. Ripens early and adapted to section 2. See section map.

SUCCESS: This most popular Eastern variety is in demand. The nut is very large and oblong, with plump, smooth creamy kernels that release perfectly from the thin soft shell. The tree is a vigorous grower and resistant to scab. It ripens after Stuart, Sections 1, 2.

DELMAS: Delmas is a beauty and makes good our saying that "MONEY DOES GROW ON TREES". It is a heavy producing tree and the large nuts are first class eating. Adapted to central Texas and section 2. We grow only varieties that will pay you.

MOORE: Similar to San Saba. Improved in size and color. Smooth thin shell and free delicious kernels that are well adapted to commercial selling, made more MONEY per tree than Moore is an enormous producer. It made more money per tree than any other pecan at the Louisiana Government Experiment Station. Especially adapted to sections 1, 2.

See Prices Page 8

Section Map

SECTION MAP: Buy with confidence at Wolfe Nursery. In cooperation with State and Government Experiment Stations, we have prepared this section Map in order that you may choose correctly the varieties to plant. We do not want to sell any plant that is not adapted and request that you study this map and pick varieties suited to your locality. Your success is our success.

SIZE OF PECAN TREE TO PLANT: The trend each year is to plant larger trees. The 4-5, 5-6, 6-7 and 7-9 foot are all good commercial sizes for planting. For yards or where trees can be well cared for, we suggest 6 to 9 foot trees for quicker shade and heavier production.

POLLINATION OF PECANS: If you have a few native pecans among your budded pecans they will usually take care of your pollination problem. Where all Paper-shell pecans are used some late pollen shedders and some early pollen shedders should be used. **EARLY POLLEN SHEDDERS:** Western Schley, Success, Halbert, San Saba Improved and Squirrels' Delight. **LATE POLLEN SHEDDERS:** Burkett, Schley, Delmas, Stuart, and Commonwealth. One tree will furnish enough pollen for 10 trees.

SIZE OF HOLE FOR PECANS: In ideal pecan soils, use a post-hole digger. The hole should be dug to a depth of about three feet deep with ample space for tap-root and lateral roots. In hard soils, the hole should be larger and plenty of good loose soil put around the roots of the trees. Feeder roots need soft soils in which to take hold. Water the soil around the roots until it settles. Don't water oftener than every 10 days.

DISTANCE FOR PLANTING PECAN TREES

35 ft by 35 ft. gives 35 trees per acre.
 40 ft. by 40 ft. gives 27 trees per acre.
 35 ft. by 70 ft. gives 17 trees per acre.
 50 ft. by 50 ft. gives 16 trees per acre.
 60 ft. by 60 ft. gives 12 trees per acre.

JOHN GARNER

FUZLESS RED NECTARINE

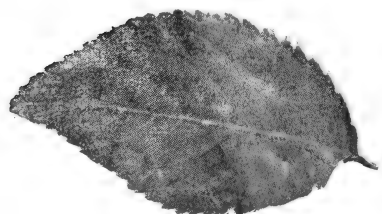

GERMAN PRUNE

SANTA ROSA PLUM

WOLFE'S MUNSON PLUM

GERMAN PRUNE: \$\$\$\$. Cross between plum and prune. Blue black color with reddish meat. Small seed. Fruit delicious and good for jellies and jams or preserves. Ripens July 10th to 20th. Sections 2, 3, 4.

FUZZLESS RED NECTARINE: \$\$\$. Fuzzless peach. Fruit medium size, very red, good flavor, heavy producer and good shipper. It's new and it sells. Sections 2, 3, 4.

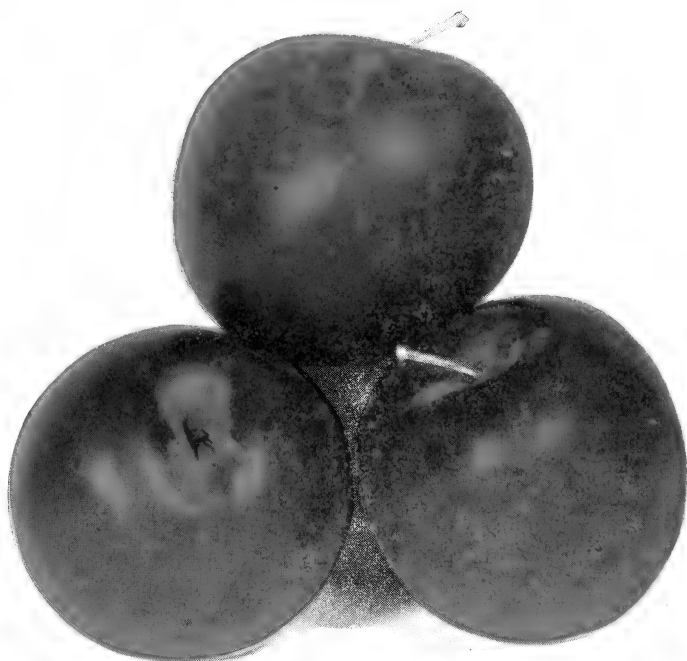

SANTA ROSA PLUM: \$\$\$\$. Largest and most beautiful plum. Leading commercial plum in California and well adapted to the South. In Sections 2, 3, 4. Purplish red in and outside and most delicious.

WOLFE'S MUNSON PLUM: \$\$\$\$ Sweet as Honey and yellow as gold. Ripens June 1st. This is our greatest plum find. Adapted to sections 1, 2, 3, 4.

WOLF'S ALLRED PLUM: \$\$\$\$ Beautiful to see, delicious to EAT and easy to admire. Allred is another of Wolfe's new fruits resulting from a never ending search for new and finer fruits. Allred attracts the eye like a passing parade. It is medium in size, highly ornamental and produces regular crops of high quality fruit. The leaf is red. The stem and branches are red. The Fruit is red outside and inside and the seed is red. It is ALLRED. Many of the trees are used in landscapes for its beauty. Sections 2, 3, 4.

WOLFE'S ALLRED PLUM

RIPE PEACHES *from May to October*

HALEHAVEN: \$\$\$\$ Freestone, Ripe June 25th. Cross between South Haven and J. H. Hale; large beautifully colored yellow fleshed peach. Splendid shipper. Heavy producer and brings top prices. We recommend it highly for sections 2, 3, and 4.

MAYFLOWER: \$\$\$ Semi-cling, ripens May 25th. Earliest peach on market and valuable for Home or Commercial purposes. It is medium size, creamy-white skin, mottled with dark red; juicy and very delicious. Sections 2, 3 and 4.

EARLY WHEELER: \$\$\$, Cling, Ripe June 5th. Peach we sell for Early Wheeler is sold by Stark for Red Bird Cling. It is better colored and has the same size and shipping qualities. Sections 1, 2, 3, and 4.

Wolfe's Giant Hale

Standard Peaches

Continued on

Page 18

BEST MAY: \$\$\$, Freestone, Ripe June 10th. Nice size peach that colors ten days before ripening. Produces heavy crops of good shipping peaches. We recommend Best May for sections 1 and 2.

PALLAS: \$\$\$, Freestone, Ripe June 10th. A good commercial variety that is ideal for sections 1 and 2.

NEW ELBERTA: \$\$\$\$ Freestone, Ripe June 20. Just as the name implies, this is a new Elberta that beats all other peaches of its class to the market. Commercial growers have welcomed this variety as a precious gift to early marketing. Take our word for it and plant a peach that will make money. Recommend for sections 2, 3 and 4.

GOLDEN ELBERTA CLING: \$\$\$\$ Clingstone, Ripe July 5th. A beautiful yellow Elberta that is becoming popular with growers. Larger than the old Elberta and much better in flavor. Sections 2, 3 and 4.

Delicious Figs This Year From Wolfe's Fig Trees

WOLFE'S EVERBEARING FIG (RAMSEY): Ripens its fruit from July until frost and each tree will produce fruit first year. Bears on its new growth. Light straw to brown in color, medium size and very sweet. Does not crack easily. La Union Orchard of Grand Prairie made \$1,600.00 from four acres of this fig in one year. Wolfe's Everbearing Fig (Ramsey) is extra good for preserves or eating fresh. Sections 1, 2, 3.

MAGNOLIA: It is not necessary to plant two varieties of figs for good results. The Magnolia produces large brownish straw-colored fruit and will bear the first year after planting. We offer only the best varieties in all fruits. Sections 1, 2, 3.

Wolfe's Cherries

WOLFE'S BUSH CHERRY: \$\$\$\$: Dark Red fruit that is excellent for jelly, jams, and pies. Frost Resistant, sure and abundant bearer. Sections 2, 3, 4. This is a new variety sold only by Wolfe. Ripe around June 1st. Bear the first year planted and will bear every year. A new fruit for the Southern states that will make money for you. Supply limited.

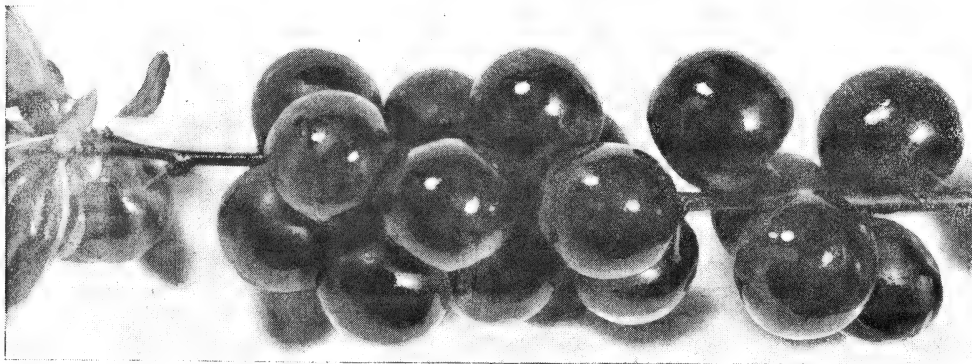

MONTMORENCY \$: Bright red, delicious flavored cherry with firm flesh. Acclaimed America's greatest canning cherry. The tree is hardy and disease resistant, less affected by wet weather. Young sure bearer in sections 3, 4, and part of 2.

EARLY RICHMOND \$: Leading early sour cherry. Ripens June 15th. Fine for pies. Be sure to include some of this variety in your order if you live in section 3, 4, of the north part of 2.

WRAGG \$: One of the most widely known cherries. Bears heavy and the fruit has a distinctive delicious flavor. Improvements of the old Wragg cherry has adapted it to sections 3, 4, and northern part of 2.

Wolfe's Bush Cherry

Plant Wolfe's Hardy Plants

BRUCE JR. \$\$\$\$, Ripens about July 1st, 20 days after Bruce. A new large productive plum that is very sweet; yellow splashed with red. It is a young, sure bearing commercial variety. Sections 2, 3, 4.

RED ACE: \$\$\$\$, Ripens June 20th. Free from canker. A Giant red fleshed plum, full of sweet sugar juice. Firm, small seed and a heavy producer. Brings fancy prices when grown in sections 2, 3, 4.

AMERICA \$\$\$\$, Ripens June 20th. Thrifty, symmetrical, spreading tree with medium to large fruit that is a bright golden color with pink cheeks. Firm flesh, Clingstone. Sections 2, 3, 4.

BURBANK: \$\$\$\$, Ripe June 25th. Large, clear purplish-red, flesh deep yellow, sweet flavor. Very prolific. A great plum produced and named for a great man. For best results, plant in sections 2, 3.

SHIRO \$\$\$\$. Ripe in July. One of the most desirable plums over a wide area. Large to very large fruit, oblong, clear yellow with small seed; firm, fine texture, unsurpassed quality for eating and cooking purposes. Sections 2, 3.

METHLEY \$\$\$. Ripe May 25th. Red fleshed, red skin and is more than three inches in circumference. Methley was introduced from South Africa and is growing in popularity as a good market variety and shipper in sections 2, 3, 4.

GOLD \$\$\$. Ripe July 1st. Similar to America but larger and sweeter. Sections 2, 3, 4.

BRUCE \$\$\$\$. Large, red, productive plum that ripens evenly around June 10th. A good Home or Commercial variety that is firm and an excellent shipper. Tasty. Sections 2, 3, 4.

SIX WEEKS \$\$\$\$. Ripe May 20th. The earliest good plum on the market. Large, rich red and excellent flavor. Sections 1, 2, 3, 4.

PLUM CHERRIES FOR HEAVY CROPS

HANSKA \$\$\$\$. Ripe in July. Fruit is red with an apricot flavor and almost freestone. Frequently double and will hang on the tree long after ripe in Sections 2, 3, 4.

COMPASS \$\$\$. Vigorous grower, hardy, prolific and bears extremely young. Fruit rather small, dark red and ripens in June. Sections 2, 3, 4.

SAPAL \$\$\$\$. Ripe last of June and a tremendous producer. Dwarfish, thrifty and often sets fruit at one year of age. Fruit medium in size, dark, with greenish splotches, flesh rich dark purple-red, rich flavor with small seed. The best jelly plum on the market. Sections 2, 3, 4.

OPATA \$\$\$\$. Ripe the last of June. Also an extra heavy producer. Tree is very beautiful when in bloom and very fragrant. Medium size fruit, purplish-red, splashed with green, flesh light green and fine flavored. . . . completely covers the long limbs. Clingstone. Sections 2, 3, 4.

 standing peach breeding
 work by Texas Agricul-
 tural Association.

Famous STUBENRAUCH Peaches

EARLY ROSE \$\$\$, Cling, Ripe June 10th. Extremely heavy producer, good canner and sells easily. It is highly colored with bright rose red and has deep sweet flesh. Adapted to sections 2, 3, 4.

MAMIE ROSS \$\$\$\$, Semi-cling, Ripe June 20th. Originated in Dallas County, Texas. Successful and sure bearing variety. White flesh and one of our best eating peaches. Sections 2, 3, 4.

LEUTICHAU: \$\$\$\$, Freestone, Ripe June 25th. Originated in Florida. Medium size, very sweet with no acid. It seems to be related to the Honey peach and is a fast growing, heavy producing peach. Sections 1 and 2.

FAIR BEAUTY: \$\$\$\$, Semi-cling, Ripe June 25th. Remarkably free of diseases. Ripens over a long period of time and profitable for early market. Can be hauled several hundred miles to market and brings fancy prices. I consider it an outstanding variety. It is a beautiful deep yellow peach with lots of red on the cheeks. Sections 3, 4.

HILEY \$\$\$\$, Freestone, Ripe June 25th. White dotted with pink and red making it a beautiful and different market peach. We recommend it highly for sections 1 and 2.

EARLY ELBERTA: \$\$\$, Freestone, Ripe July 1st. A beautiful peach, one-third larger than the regular Elberta. Contains lots of yellow and is one of our best market varieties. We have the genuine strain and all our trees are budded from bearing trees. Adapted to sections 2, 3, 4.

473 Fair Beauty peaches picked from W. H. Smith's 2 year old tree. Wolfe's trees bear young,

MR. ROSS R. WOLFE
 Stephenville, Texas

Dear Friend:

Realizing the active part of my life is drawing to a close, it is my desire and request that you propagate and disseminate the desirable peach varieties that I have bred and created and that you will continue the breeding work which I have done.

Signed,

J. W. STUBENRAUCH.

Wolfe's GIANT HALE

LEONA: \$\$\$\$, Freestone, Ripe July 5th. Big yellow fruit ripe one week ahead of Elberta. Popular among good growers. Extra in color and quality. Adapted to sections 1, 2, 3.

ELBERTA: \$\$\$, Freestone, Ripe July 10th. This yellow peach needs no description. I have an improved strain of the original variety that bears heavier and more regular than the old variety. It is third to TEXABERTA and FRANK on the Market.

WOLFE'S GIANT HALE: \$\$\$\$, Freestone, Ripe July 15th. Our Hale is a Grand Champion at all the shows. Thinned properly, the big ones often weight **ONE POUND** and measure **ONE FOOT** around. Our huge dark red Hale commands instant attention at all markets and sells like Hot-cakes at two and three dollars per bushel. We guarantee this great peach from coast to coast. Sections 1, 2, 3, 4.

W. H. Smith Jr. and his State Grand Champion Wolfe's Giant Hale

SMITH: \$\$\$\$, Freestone, Ripe July 15th. This little white peach should be in every HOME ORCHARD. It bears tremendous crops every year and is the best peach you ever ate. It is as sweet as HONEY, acid free and pretty as a picture. Sections 1 and 2.

TENA: \$\$\$\$, Freestone, Ripe July 10th. Crossed with Mamie Ross and Elberta, Tena gives you the quality of both fruits in one. Tena is another of Wolfe's FROST-RESISTANT varieties and will pay big dividends regularly. Recommended for sections 1 and 2.

BARBARA: \$\$\$\$, Freestone, Ripe August 10th. A SISTER to FRANK so you know it must be good. Same vigor of tree and bearing habit of Frank. It is larger with beautiful shape and color and pointed at the end. Has not missed a crop in SIXTEEN YEARS and is a heavy producer. The original tree in the Stubenrauch orchard has a spread of 37 feet and has produced 15 bushels of big number one peaches. Recommended for Section 2, 3, 4.

SURPRISE: \$\$\$\$, Cling, Ripe October 20th. Good for eating, canning, pickle, preserve and commercial purposes. Due to its fine qualities, color and time of ripening, it has a great future as a valuable market variety. Will do well most anywhere in sections 2, 3, 4.

NOTE: We grow several varieties that we have not catalogued and will be glad to furnish most any desired variety upon request.

to Your Letters*

See New Low Prices on Page 18

Frost-Resistant FRUIT AND NUT TREES PAY

Giant **BOYSEN BERRY** *A Sensation*

This amazing new berry is huge in size . . . about one by two inches in size and has an amazingly rich flavor that makes every one want more. Our pickers in the patch eat and pick. As delicious as they look. Plant this new berry for profits. Mr. Knott of California made 11,500 pounds per acre and realized \$1,760.00 per acre. Boysenberry is FROST-RESISTANT and DISEASE RESISTANT. Plant Boysenberry 6 to 8 feet apart. Try our UTILITY berry in sections 1, 2, 3, 4. PRICES: 10 for \$1.00; 50 for \$4.00; 100 for \$6.95; 1,000 for \$46.00.

AUSTIN DEWBERRY: First berry to ripen. Hardy and prolific. Delicious and easy to grow. Large. Sections 2, 3, 4. PRICES: 10 for 60c; 50 for \$2.50; 100 for \$3.50; 1,000 for \$25.00.

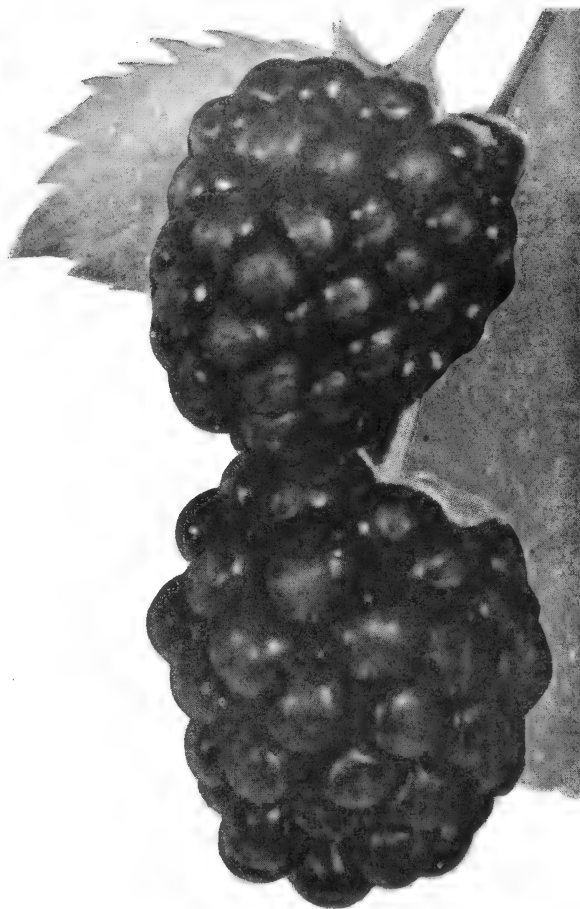

Wolfe's **DEW-BLACK** *Early Wonder*

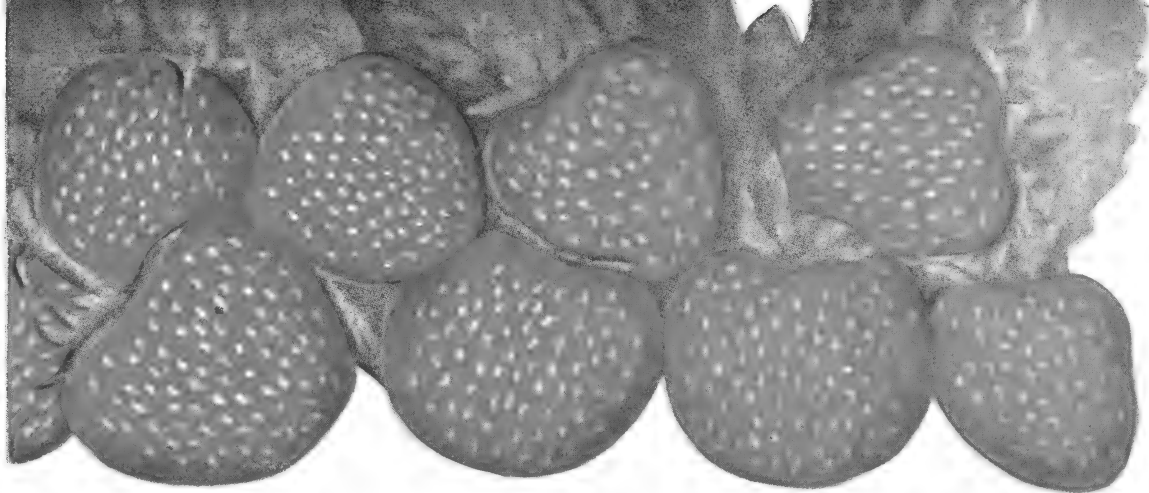

Cross between dewberry and blackberry. Tips root the first year and then stand and handle like blackberry. Small seeds, self Fertile, large as Austin Dewberry, sweet juicy flavor and ripens from May 20th to July 1st.

DROUTH RESISTANT and **FROST RESISTANT.** Produces a crop every year . . . 1,000 to 2,000 gallons per acre. We shipped this berry to 44 states last season. Good in sections 1, 2, 3, 4.

PRICES: 10 for 95c; 50 for \$3.75; 100 for \$5.95; 1,000 for \$40.00.

PARKER (thornless) **YOUNGBERRY:** Cross between dewberry and Loganberry. Sections 2, 3, 4. PRICES: 10 for 95c; 50 for \$3.95; 100 for \$6.75; 1,000 for \$45.00.

K L O N D Y K E

The Perfect Strawberry for Home or Market. The berries are uniform in shape and size, beautiful dark red color with a distinctive mild, delicious flavor. A strong productive berry that sells for fancy prices. Plants make quick growth, are tall and compact, stalks strong, healthy green leaves. \$1,000 per acre can be made from this all purpose berry. Plant them in a barrel and have a barrel of fun. We recommend Klondyke for sections 1, 2, 3, 4. Plant about one foot apart in rows eighteen inches apart. Plant during early Spring—of February and March.

PRICES: 100 for \$1.00; 200 for \$1.85; 500 for \$4.25
1,000 for \$7.50

MASTODON EVERBEARING

Wolfe's extra heavy bearing, strain of Mastodon are hardy and will fruit three months after planting. It is the most extensively planted strawberry in the United States. The fruit is very large, deep waxy red with tender, sweet firm flesh. There are many varieties of Strawberries but experience has taught us that it only pays to plant the best. Plant in February and March. Important: Choose clean soil, set plants without doubling roots, mulch to retain moisture and keep RIPE berries picked. We recommend MASTODON for sections 1, 2, 3, 4.

PRICES: 100 for \$1.75; 200 for \$3.00; 500 for \$4.50;
1,000 for \$12.50

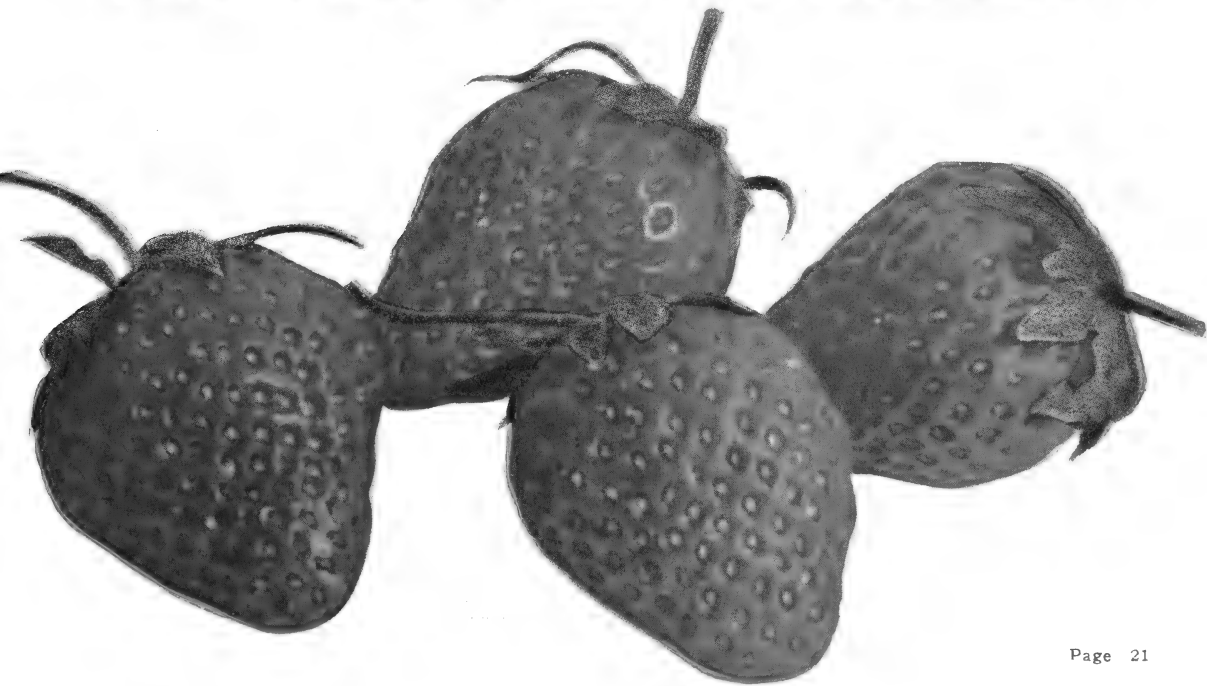

Barrel of Strawberries and a Barrel of Fun

25 Klondyke \$1.00 POST PAID
25 Mastodon

Have Strawberries for breakfast twice a week. Bore 40, 2 inch holes in the side of the barrel and set 10 plants on top. Keep well watered. Bore small holes in bottom for drainage. Keep runners pinched off. EAT.

from Wolfe Grapes. Put your idle
land to work and make it pay.*

Vineyards, Arbors and Pergolas.

THOMPSON SEEDLESS: Heavy producer, greenish white, large compact bunches. Adapted to Southwest Texas and New Mexico: Section 4.

GOLDEN MUSCAT: Productive grower, large clusters, compact, sweet and tender. Ripe after Concord. Sections 2, 3. 50c each.

CACO: Cross of Concord and Catawba. Most delicious flavor. Fair size bunches of large pink fruit. Skin does not crack. Section 2, 3. Ripe July 10th.

ELLEN SCOTT: Self fertile. Stocky, vigorous grower. Large to very large grape. Violet color. Skin does not crack. Extra flavor. Sections 2, 3.

GUMERA: Perfectly adapted to our colimate. Grape very large, purple, thin skin with few seed. Clusters extra large . . . weighing up to three pounds. Sections 2, 3, 4.

BLACK SPANISH: Profilic. Clusters open but large with medium size fruit. Fine for wine. Adapted to Southwest.

AMERICA: Plant with Beacon or Concord. Growth very strong. Bears heavy with long are pruning. Grape black and medium size. Splendid for table or Wine and adapted to all sections 1, 2, 3, 4.

BAILEY: Self fertile. Prolific. Large black grape in large clusters. Ripe August 20th. Excellent quality and adapted to sections 2, 3, 4.

BEACON: Self Fertile. Extra good grower. Grape large and black. Clusters compact and skin never cracks. Ripens July 25th. Very fine in sections 2, 3, 4. Fine for jellies.

CARMAN: Blue-black with large bunches. Self fertile and very prolific. Immune to leaf folder and mildew. Skin never cracks. Good quality. Sections 2, 3, 4.

CATAWBA: Self fertile. Found in 1801 in N. C. Medium size, clear dark-red with exquisite flavor. Fine table or Wine grape. Sections 2, 3, 4.

CHAMPANEL: Black with tough skin, tender flesh. Adapted to any soil and especially black waxy land. Ripe with Concord. A good shipper and withstands dry hot weather. Sections 2, 3, 4.

Wolfe's Flowering Shrubs for Colorful Blossoms all Season

Permanent Beauty to Glorify the Color Scheme in the most effective—sure-to-grow Flowering Shrubs. Plant a charming and restful Garden of Beauty at the LOWEST cost with Wolfe Shrubs.

ALTHEA. Rose of Sharon. Upright shrub that flowers in both double and single white or red blossoms. 2-3 ft. 30c; 3-4 ft. 40c.

FLOWERING ALMOND: Double pink flowering. Rather dwarf with double pink blossoms almost covering the limbs in early Spring. Prices: 18 to 24 inch, 65c.

RED LEAF BARBERRY. Low-growing plant with spreading branches. Bright red in Spring and Bronze red in the Fall. Huge clusters of scarlet berries make it an unusual Shrub. Prices: 12 to 15 inch, 65c; 15 to 18 inch, 75c.

BRIDAL WREATH: (Spirea V. H.) Graceful up-right grower with deeply cut attractive foliage. A mass of white blossoms in the Spring. Prices: 18 to 24 inch, 25c; 2-3 ft., 35c; 3-4 ft., 40c

BUTTERFLY BUSH (Buddleia) New well shaped shrub, literally covered with cone-shaped clusters of deep rosy-lilac blossoms from July until frost. Grows anywhere. Prices: Small, 30c; Large, 40c.

CRAPE MYRTLES: Best shrub for South. Stands dry weather. Blooms soft fluffy flowers in dense heads all summer long. RED, PINK, ORCHID. Prices: 18 to 24 inch, 25c; 2-3 ft., 35c; 3-4 ft., 50c

CYDONIA JAPONICA (Flowering Quince) Spreading Picturesque plant with single bright orange-scarlet flowers for Spring. Prices: 2-3 ft., 50c

RED DOGWOOD (Osier) Spreading but erect grower, red branches and white fragrant blossoms or red. Prices: 3 to 4 ft., 35c

GOLDEN BELL (Forsythia) Medium growing shrub with showy yellow blossoms, orange center, covering bush in early Spring. Prices: 18-24 inch, 20c; 2-3 ft., 35c; 3-4 ft., 40c

FLAME HONEYSUCKLE (bush) Large flame coral trumpet shaped flowers lined with gold. Immense showy clusters the first Spring. Dark blue green foliage. Can be used as a climbing shrub. Flowers abundantly from May until frost. Can be used as a Flaming hedge. Prices: 12-18 inch, 40c; 18-24 inch, 50c; 2-3 feet, 75c

LILACS: White or Purple. The old fashioned Lilac only a much improved blossom. Fragrance deluxe. Prices: 2-3 ft., 35c; 3-4 ft., 50c

RED-BUD (field specimens) Small tree-like shrub covered with rosy-purplish flowers before the leaves put out in the Spring. Every Landscape should have one or more. Prices: 2-3 ft., 35c; 3-4 ft., 50c; 4-5 ft., 75c; 5-6 ft. \$1.00

FLOWERING PEACH: Tree similar to peach but more dwarf and has brighter green leaves. It is a mass of big double rose-like blossoms in the Spring. Order either RED or WHITE. Prices: 2-3 ft., 35c; 3-4 ft., 50c

WEIGELA: (Rosea) Upright, medium shrub with trumpet-shaped flowers varying from flesh-pink to deep rose. 18-24 inch, 25c; 2-3 ft., 40c

WISTERIA (Chinese) Wolfe's new Wisteria blooms the first year, large and richer in color. Beautiful cone shaped clusters of rich purple flowers literally cover the limbs throughout the Spring, and Fall. Grows as a bush, vine or long Climber and can be used effectively to cover un-attractive trees, walls or fences. Mrs. Wolfe says "Wisteria is the handiest Shrub we grow." Prices: 2 Year medium size, 35c; 2 Year heavy size, 50c

MIMOSA (Silk tree) Has an umbrella-like top, feathery foliage and the most striking, fragrant pink blossoms covering the limbs in the summer. The flowers look like PINK SNOW covering the long graceful limbs. The leaves fold up at night like a sleepy vine and the limbs seem to bow in reverence to Mother Nature. This extra hardy flowering tree will reach from 10 to 16 feet in height and have a top spread of forty feet. Sections 1, 2, 3, 4. Prices: 2-3 ft., 45c; 3-4 ft., 75c; 4-5 ft., \$1.00; 5-6 ft., \$1.25.

Let Wolfe SHARE your PLANTING PROBLEMS

EVERGREENS

Use Wolfe's New Landscape service and plant for the lowest possible cost. The Evergreens offered here are LINER SIZE, carefully grown in pots to give them a superior root-system for a better start. You can save money and still have a superb landscape by ordering from us.

35c each
3 for \$1.00

BERKMANS GOLDEN: Dwarf, compact, almost globular arborvitae with yellow-greenish foliage tipped with gold in the Spring. Grows to 6 or 8 feet tall. Use for background planting.

BAKER'S PYRAMIDAL Arborvitae: Compact and pyramidal with dark green foliage. Grows to 8 or 10 feet in height.

BONITA ARBORVITAE: Globe-shaped, dwarf-growing plant with dark green foliage. Grows to 3 or 4 feet high. Graceful when planted at an entrance or by steps.

ITALIAN CYPRESS: Tall columnar growing Evergreen with soft, dark green foliage. Will reach a height of 25 feet. Use with Pfitzer Junipers to build up tall lines.

PFITZER JUNIPER: Handsomest and most popular low spreading juniper. Beautiful silvery-green foliage. Ideal for corner planting and border filling.

ABELIA: Beautiful evergreen with glossy foliage that blooms from May until frost with a mass of fragrant white and pink flowers.

EUONYMUS JAPONICA: Waxy, glossy, hardy evergreen that may be pruned as a hedge or it will cling to a wall.

LIGUSTRUM JAPONICA: (Japan Privet) Large, handsome, upright with broad, dark green foliage and white flowers in loose panocles followed by black berries.

NANDINA: Bright red berries with red leaves through cold weather. Color changes with the seasons. Use under windows and mix in with other plants for fiery beauty.

PHOTENIA: (Holy leaf type). A most successful evergreen. Dark reddish green leaves that are broad and serrated on the edges. Beautiful white fragrant flowers in the Spring make it ideal for tapering the lines and using as a filler.

PYRACANTHA LELANDI: U. S. Government introduction. Spreading evergreen covered with clusters of orange berries in the winter. Seen in many highway plantings. Use in backing the landscape.

PYRACANTHA BARLOW: Grandest of all Pyracanthas, semi-upright with profuse and enormous quantities of scarlet red berries covering the branches. Use for smart colorful contrast.

SENISA: Truly a gorgeous sight. Hundreds of people stopped by our Nursery this summer to see this plant in bloom. Many had never seen anything like it. Our Senisa has silver leaves and grows into a beautiful well shaped plant. During the summer, it is completely covered with dainty lavender flowers. **PRICES:** 9-12 inch .55 18-24 inch \$1.00

JASMINE FLORIDIUM: Best of all Jasmines, having rich green winter foliage with yellow flowers from spring until frost.

*Drive to the Nursery for Large Balled
and Burlapped Evergreens:*

HEDGE PLANTS *A Friendly Fence*

AMOUR RIVER PRIVET: The best evergreen privet hedge. 6-12 inch, 2c ea. 12-18 inch, 3c ea. 18-24 inch, 5c ea. 24-30 inch, 10c ea. somes. 40c each; 10 for \$3.00.

LODENSE PRIVET: Use for low border hedge. It has tiny green leaves that stay green all winter. Prices: 2 year plants 24c each.

'You can grow Dahlias like these.' Mrs. Wolfe.

SHADE TREES

CHINESE ELM: 3-4 ft., 25c; 4-5 ft., 35c; 5-6 ft., 60c.

WEeping WILLOW: (Babylonian) 3-4 ft., 40c; 4-5 ft., 65c; 5-6 ft. 95c.

CATALPA, BLACK LOCUST, RUSSIAN MULBERRY, HICKS MULBERRY, SILVER MAPLE and AMERICAN-SYCAMORE (free from root-rot) Price: 3-4 ft., 50c; 4-6 ft., 75c; 6-8 ft., \$1.10; 8-10 ft. \$1.65; 10-12 ft., \$2.25 Subtract 10 per cent from these prices when 10 or more shade trees are ordered.

GUARANTEED QUALITY

Wolfe's VINES

QUEEN'S WREATH: A long slender vine that produces recimes of pink flowers on grape-like clusters. Blooms from mid-summer until late frost. Price: 1 year vines, 15c each; 2 for 25c; 2 year vines, 25c each; 2 for 35c.

HONEYSUCKLE: Evergreen honeysuckle with yellow and white fragrant flowers. 2 year vines 30c each.
